Students may earn an Associate in Science (AS) Degree, which is designed for those who complete a 93 credit program that is parallel with the first two years of a baccalaureate institution to which they intend to transfer. A cumulative GPA of 2.0 or higher is required for successful completion of this degree.

Important Notice

Transfer students should plan their degrees in accordance with the requirements of the institution to which they plan to transfer. They should also be aware that colleges within universities may have admission requirements significantly higher than the 2.0 GPA required for the AS Degree and that they may look at performance in specific classes in determining a student’s admission.

Selecting the appropriate courses in fulfilling the AS Degree saves students time and expense in completing the requirements of a bachelor’s degree. Courses that are considered upper division (junior-senior level) at a baccalaureate institution may need to be repeated if taken at a community college.

Students may meet graduation requirements in the catalog current at the time of their initial enrollment, provided enrollment toward their educational objective is continuous (from quarter to quarter) during the academic years involved. Otherwise, graduation requirements will be those listed in the catalog in use at the time of graduation.
