Course Description
This course is the first in a three part series that introduces basic physics concepts. This course will use mathematics to model physical behaviors so algebra and trigonometry will be used heavily. Knowledge of calculus is required.

Specifically, this course will cover motion including linear, projectile, and rotational, forces, kinetic and potential energy, and momentum. This course introduces concepts found in two entry level engineering courses: statics and dynamics.

Class Schedule
- Mondays, Tuesdays, Wednesdays, Fridays, Room 225, 12:30 pm – 1:20 pm
- Thursdays, Room 225, 12:30 pm – 2:20 pm (labs)
- No class on Wednesday, November 11 (Veterans’ Day)
- No classes week of Nov. 23-27 (Thanksgiving)
- Last class is on Monday, Dec. 7
- Final exam is on Wednesday, Dec. 10, Room 225, 12:30 pm – 2:20 pm
