Exploring Geology: Glaciers

Item # 3103 Max Students: 25 \$38.50

Glacial landforms cover much of the Cascades, the Okanogan Plateau, northern Idaho, and the Wallows. Yet neither Walla Walla nor the nearby Blue Mountains were ever glaciated. What is the difference between an ice age and a glaciation? How do glaciers and meltwater erode, transport, and deposit? This class will focus on the Missoula floods, northwestern Wyoming region, and Greenland. Students will be invited to make short presentations on their favorite glacier.

Bob Carson Main Bldg. D Room 242
Jan. 28-Feb. 6 Mon. & Wed., 6:00pm-7:00pm

Exploring Geology: Volcanism

Item # 3104 Max Students: 25 \$38.50

Walla Walla is surrounded by millions of years of volcanic rocks. The volcanism extends from the andesite of the Cascade volcanoes to the

west, across the basalt of the Columbia Plateau, to the rhyolite of the Yellowstone hotspot to the east. What are the relationships between plate tectonics, volcanism, climate, and landforms? This class will highlight the Cascades, Yellowstone, and Iceland. Students will be invited to make short presentations on their favorite volcano.

Bob Carson Main Bldg. D Room 242
Jan. 7-16 Mon. & Wed., 6:00pm-7:00pm

Earth, Wind, and Water

Item # 3105 Max Students: 44 \$65.00

Take a Quest day trip! Experience a tour of McNary Dam on the Columbia River where students will visit the juvenile fish facility and the powerhouse. In addition, the group will study Wallula Gap and the Stateline Wind Farm. In the vicinity of the Gap, we will hike and explore millions of years of basalt eruptions, structural deformation, drainage changes, catastrophic floods, and wind deposition. Meet at 7:50am in the WWCC parking lot at the flagpole.

Ancient DNA and the Science of Human Past

Item # 3110 Max Students: 30 \$34.40

We carry in each of our cells a vast database of the human past. When cell structures are combined with the cells of others, it enables us to reconstruct migrations and social structures. Whether those cells are living or dead the data we retrieve is vital. This class will explore how that is done and make it comprehensible to the non-specialist.

John Jamison Main Bldg. D Room 243
Mar. 11 Mon., 2:00pm-4:00pm

Microworlds

Item # 3116 Max Students: 12 \$38.50

Come explore a world you may have never seen, but has always been there! Discover the incredible diversity of life rarely seen by the naked eye. Students will observe the world of microorganisms from samples taken on campus and nearby locations. They will learn how to work with microscopes, the roles of microorganisms in our environment, why they're

important, and familiarize themselves with the most common types of microbes. You'll never look at a pond the same way again!
